Here are a few important reminders prior to your surgery visit.

Pick up over the counter regular strength Tylenol and Advil (if your stomach can tolerate Advil) to use after your procedure. Have available soft cold foods and plenty of ice for after your procedure. Make sure you eat prior to your appointment and don't come in on an empty stomach. Pick up your medications in advance if you have not already done so. You will need the day of and the day after your procedure to recuperate, make sure you have no errands to run during this time. Dr. Lapidus request that you do NOT fly on a plane for at least one week following your procedure. Please make sure you schedule accordingly.

If you have any questions, please feel free to call our office prior to your appointment to discuss.

Thank you,

Jessie Creecy
